Grenoble, France, June 12 2018

The DrumBrute and MicroBrute have become favorites of Arturia's hardware offering, combining versatile, tweakable analog sound, incredible connectivity, intuitive fun design, and performable controls into powerful, affordable creative packages.

Now with the introduction of the limited edition Creation series, these modern classics have been updated with a fresh new look and a striking contemporary design, encouraging creativity and helping you capture those moments of inspiration.

Individually, each instrument will push you to create music in new, awesome ways. Together, they'll become a revolution. Combining classic, award-winning design and sound with a daring aesthetic, these limited edition analog music-makers can't wait to inspire you.
